To avoid problems related to cross clamping, the Kowalski aortic clamp was created, which provides equal pressure distribution along the jaws, specially designed to hold large aortas or vessels with connective tissue disorders. & Nbsp; Experience this perfection with our reliable, perfectly balanced and lackluster instruments made of steel or titanium. A thoracic surgeon will perform operations on the heart, lungs, esophagus and other organs of the thorax. Economy through diversity. PDF VATS (Video-Assisted Thoracic Surgery) Surgical Holdings distributes the Reuchlen line of specialized VATS instruments. Our reusable aortic punch is the only one of its kind in the world, and rightly so. For sufficient stability, a large amount of force is no longer needed when pulling the rib arches and the system is easily adjustable. All this can be done with products from KLS Martin. The ergonomic design of the handle as well as the fully integrated joints at the distal end, make the products the safest companions in minimally invasive heart surgery. We can also offer managed services across this range of thoracic instrumentation.
